

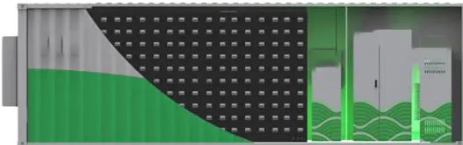

Photovoltaic panel rack for mountain areas

Overview

Mountainous areas are not off-limits when it comes to solar energy projects. With the right approach and equipment, it is entirely possible to install a ground solar mounting rack. The IronRidge® Ground Mount System combines our XR100® or XR1000® Rails with locally-sourced steel pipes or mechanical tubing, to create a cost-effective structure capable of handling any site or terrain challenge. This includes evaluating the topography, soil conditions. The installation of solar racks on mountainous terrain necessitates an in-depth understanding of both the environmental conditions and the mechanical requirements pertaining to the installation process. Prices will vary based on the # of solar panels you have / need.

Photovoltaic panel rack for mountain areas

Sinclair SkyRack HD

Our American-made ground mount solar rack system is versatile, easy to install, and a fraction of the cost of competing brands. Prices will vary based on the # of solar panels you have / need. You can ...
