

Photovoltaic panel sealing strip lifting artifact

Overview

This Dense Rubber T-Gasket is designed for solar arrays with top clamps and ideal for gaps from 13 mm / 1/2 inch up to 18.5 mm (0.5 inches). By continuing, I agree to the and authorize you to charge my payment method at the prices, frequency and dates listed on this page until my order is fulfilled or I cancel, if permitted. These seals are essential for improving the durability and efficiency of solar photovoltaic systems, ensuring they maintain optimum. Solar Panel rubber sealing strip use high quality EPDM material, It has good anti-aging effect and long service life. It can be used outdoors for a long time. Solar photovoltaic panel gap sealing strip. And EPDM rubber seal strip fits in between the panels to seal the gaps, making a Solar cover a water - tight shelter, ideal for Solar car ports or structures. Silicone rubber extrusion.

Photovoltaic panel sealing strip lifting artifact

T-Type EPDM Rubber Sealing Strip for Gaps in Solar Photovoltaic Panels

Our company covers an area of 4,000 square meters, with a modern seal production line, hard enclosed mixing machines and 68 sets of curing equipment. The designed production capacity is 10 million ...
