

Photovoltaic support prefabricated pile foundation

Overview

The construction method for a pile foundation of a photovoltaic support comprises: performing a pull-out force test, so as to obtain the actual friction coefficient of an installation area; prefabricating an upright during or prior to the pull-out force test;. The construction method for a pile foundation of a photovoltaic support comprises: performing a pull-out force test, so as to obtain the actual friction coefficient of an installation area; prefabricating an upright during or prior to the pull-out force test;. Photovoltaic array foundations mainly include concrete embedded parts foundations, concrete counterweight block foundations, spiral ground pile foundations, directly embedded foundations, concrete prefabricated pile foundations and ground anchor foundations. These foundations have the. Prefabricated pipe pile photovoltaic support installation diagram gth concrete (PHC piles), steel piles and steel pipe screw piles. The first three are cast-in situ t helical piles for solar panel foundations.

Photovoltaic support prefabricated pile foundation

WO2025001941A1

The present invention relates to the field of photovoltaic apparatuses. Provided are a construction method for a pile foundation of a photovoltaic support, a pile foundation, and a
