

Portable power solar station in Sao-Paulo

Overview

The plant has a capacity of 7 MW and features 10,500 solar panels mounted on high-density polyethylene floats. It will operate under the country's net metering scheme. In Brazil's bustling economic hub, a groundbreaking energy revolution is taking shape. The Sao Paulo Photovoltaic Energy Storage Project stands as South America's most ambitious attempt to harness solar power at utility scale while solving renewable energy's Achilles' heel - intermittent supply. From pv magazine Brazil The government of Sao Paulo has announced the completion of the first phase of the UFF. The State of São Paulo inaugurated and delivered, this Wednesday (17), the first stage of implementation of the first floating solar plant in the capital of São Paulo, at the Billings dam. It is planned in Sao Paulo, Brazil. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. The new photovoltaic plant (called UFF Araucária), with 10.
