

# Prague solar container energy storage system Peak-Valley Arbitrage Project

## Overview

---

A 10MWh energy storage container project at an electronics factory, based on the local peak valley electricity price difference (1.2 yuan/kWh during peak hours and 0.3 yuan/kWh during valley hours), adopts the "AI prediction dynamic adjustment" charging and discharging. Sungrow rolled out the brand-new energy storage system -- ST129CP-50HV Series, for APAC commercial & industrial market. The energy storage system EMS automatically. Are energy storage systems more cost-effective than batteries for Energy Arbitrage?

The retrofitted energy storage system is more cost-effective than batteries for energy arbitrage. It can absorb the electrical energy from power system in a valley period, and it can also release its energy to power system in a peak load period.
