

Price of photovoltaic household inverter

Overview

A solar inverter makes up about 10% of the total cost of your solar energy system. The size of your system, the type of inverter, and the efficiency rating affect your final cost. Most solar panel contractors. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. A solar inverter costs \$1,500 to \$3,000 total on average for a medium-sized solar-panel system installation. String inverter systems cost less up front, but systems using microinverters last. That's where solar inverters come in. Inverters are found in nearly every solar installation, from small residential systems to large utility-scale plants, typically mounted near the main service panel, in a garage or directly beneath the panels. We offer a wide selection from top manufacturers, so you can be sure you're getting quality and value.
