

Profits from photovoltaic panel sales

Overview

Profit from selling solar panels can vary widely based on multiple factors, including market conditions, panel quality, sales strategy, installation services, and customer awareness. Typically, margins can range from 10% to 30% or more, depending on the supplier's pricing. Many assume selling solar panels is highly lucrative. These photovoltaic cells are made of semiconductors such as silicon, which absorb the energy from the sun's rays in the solar energy industry. You can't exactly sell the electricity your solar system generates back to the utility.
