

Rural photovoltaic solar panels were stolen

Overview

The incident has raised concerns about security at renewable energy sites, as theft could potentially hinder local sustainability efforts. Thieves target farm solar installations due to their remote locations, high resale value, and the difficulty in tracking stolen panels. Farm operations relying on solar-powered irrigation systems. In June this year, a farmer who had £70 000 worth of high-tech equipment stolen believes a gang spied on his premises with a drone. The panels were taken from a facility in the southern part of the city, near an area known as La Mocha.
