

Sand washing of solar panels

Overview

Regular solar panel cleaning ensures maximum energy production while also extending the lifespan of your panels. Even a thin layer of dust, pollen, or grime can quietly cost hundreds of dollars a year in lost production. Installing solar panels is one of the smartest investments American homeowners can make. However, in order to remove desert sand quickly and effectively from solar systems without fail, you need a specific cleaning solution. With the SunBrush Mobil cleaning system, you will always be playing it safe. The system can be deployed anywhere, it is easy to install, it can be easily. To keep your solar panels working effectively, it's a good idea to wash them once or twice a year or whenever they're particularly dirty. seksan Mongkhonkhamsoo / Getty Images Keeping your solar panels clean is essential for maintaining their efficiency and maximizing energy output. While going solar is pretty much a "set it and forget it" way to power your home with renewable energy, depending on where you live.
