

# Selling off solar power technology

Warranty  
**10 years**

LiFePO<sub>4</sub>

Intelligent BMS

Wide Temp:  
-20°C to 55°C

## Overview

---

Over the last six months, two major US utilities – American Electric Power (AEP) and Duke Energy – have sold off all or part of their commercial solar PV assets to private investment groups and consolidated their operations. Self-consumption beats exports – Maximizing the solar electricity you use directly in your home typically provides better financial returns than exporting excess to the grid, especially with time-of-use rates and battery storage becoming more common in 2025. Federal tax credit uncertainty looms –. Solar net metering is a smart, rewarding way to get the most out of your solar panel system. It also covers energy compensation schemes. According to Syliva Levya Martinez, principal analyst of North American.
