

# Single-phase and three-phase uninterruptible power supply

## Overview

---

What is the difference between single-phase and 3-phase UPSs?

With three times the power of a single-phase Uninterruptible Power Supply (UPS), 3-phase UPS is the most efficient way to deliver power to data centers or industrial applications for load levels typically higher than 10-20. What is the difference between single-phase and 3-phase UPSs?
