

Solar configuration in brazil

Overview

The states in the south and southeast regions of Brazil have the most distributed solar capacity: São Paulo (5.7 GW), Rio Grande do Sul (3. In 2022, São Paulo surpassed Minas Gerais in solar distributed. The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.2 million. Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's energy security, sharpening its industrial competitiveness and putting its 2030 climate pledges within reach. Distributed solar generation capacity grew from less than 1 gigawatt (GW) in 2018 to 40 GW in 2025 through June, accounting for 43% of all electricity capacity additions. In the last five years, Brazil has increased its solar photovoltaic energy generating capacity by more than 6-fold. 5% of all installed capacity in the.

Solar configuration in brazil

Brazil's solar capacity reaches 60 GW

Brazil's operational solar capacity now consists of 42.1 GW from small and medium-sized systems and 17.9 GW from large-scale solar plants. Solar currently represents 23.5% of all installed
