

# Solar container battery fan control

## Overview

---

This smart, self-powered fan system uses solar energy to actively remove hot, moist air—protecting your contents from heat, humidity, and pests. Key Features & Benefits: Solar-Powered Performance: Charges during the day and runs the fan at night—no wiring or external power needed. We are pleased to announce a new product, the Blue Breeze battery box vent fan. This product is designed with a proprietary circuit that allows any voltage from 12 - 65 DC to be applied to the fan assembly. The battery works for up to 8 hours after full charged in sunlight, supports the ventilation during night time or. Heat is a primary adversary of battery health, reducing both performance and lifespan. In many locations electrical code requires a power vent (the NEC and CEC both do), though especially for regular flooded lead-acid battery banks it is a very good idea to vent them with a power vent regardless of code. 400 CFM provides a complete air exchange every 3 minutes in a 20 ft container and every 6 minutes in a 40 ft container under ideal conditions. Quiet operation, fully assembled - No On or Off switch! In most jurisdictions, low-voltage (12V) fans can be used in hazardous materials (HAZMAT) settings. Upgrade your airflow with the Amtrak Solar 20" Box Fan Kit, built for power, durability, and simplicity. This industrial-strength fan, paired with a 100-watt high-efficiency solar panel, delivers maximum ventilation for large areas like garages, greenhouses, barns, RVs, and workshops — all with.
