

Solar inverter manufacturer standards

Overview

This article describes the main certifications for solar inverters. Key certifications include UL (Underwriters Laboratories) standards like UL 1741, IEC (International Electrotechnical Commission) standards such as IEC 62109, ISO. Solar inverters are critical components of any photovoltaic (PV) system. They convert direct current (DC) generated by solar panels into alternating current (AC) suitable for home or commercial use. UL Solutions provides inverter and converter testing and certification and evaluation services for compliance with a wide range of. IEEE Standard 1547-2018, titled “IEEE Standard for Interconnection and interoperability of Distributed Energy Resources with Associated Electric Power Systems Interfaces” provides a set of criteria and requirements for the interconnection of distributed generation resources to the electric power.
