

# Solar panel surplus power grid connection price

## Overview

---

The typical cost of grid interconnection for tying a wind or solar project into the power grid is \$100-300/kW or \$3-10/kW-km of distance. Your solar system connects to the electrical grid through a bidirectional meter that tracks both electricity consumed from the grid and electricity fed back into it.

Brand/Model: SolarSet LT-4-OGS-2. 75 kW Standard Off-Grid Solar System • (4) 688 Watt (BSTC), Bifacial Monocrystalline Solar Panels. • (1) EG4 Inverter, UL 1741 Certified, Nema 3R, Includes DC disconnect. This guide explains solar energy and net metering. Electricity rates vary by location. The price you pay for every kilowatt-hour is your regular energy rate, so the same rate you would pay without solar panels. They incentivize more people to produce more electricity from solar. How much you can earn by selling energy back to the grid depends on a few key factors: your energy usage, how many.
