

# Solar photovoltaic support steel price

## Overview

---

As of February 2025, the photovoltaic steel market shows dynamic pricing patterns influenced by global decarbonization efforts. The benchmark 355 series strip steel in Tangshan currently trades between ¥4,100-4,300/ton, reflecting a 15% year-over-year increase from 2023 levels. Investing in high-quality, corrosion-resistant steel reduces maintenance costs and extends the structure's life. Lightweight steel frames work best for rooftops, while heavier, stronger. A solar panel support structure is a critical component in any photovoltaic (PV) system, ensuring panels are securely mounted and optimally positioned to capture sunlight. All the profiles used in our solar panel structure systems are made of S350-GD. MODSTEEL manufactures solar energy steel support profiles. Furthermore we can manufacture according to customer wishes. Our prices will be. Structural Material: Aluminum, Stainless steel, Galvanized low alloy steel Mount type: JMS solar mounting bracket/PV solar panel tilt roof mount/bracket/racking system Surface treatment: HDG (hot-dip galvanization), Pre-galvanized, Electrical galvanized (yellow or white), powder coating (black).

## Solar photovoltaic support steel price
