

Solar power generation is not expensive

Overview

In 2024, solar photovoltaics (PV) were, on average, 41% cheaper than the lowest-cost fossil fuel alternatives, while onshore wind projects were 53% cheaper. Onshore wind remained the most affordable source of new renewable electricity at USD 0. Abu Dhabi, United Arab Emirates, 22 July 2025 - Renewables maintain their cost leadership in global power markets, IRENA's new report on Renewable Power Generation Costs in 2024 confirms. A new analysis shows just how much of a gap there is between renewable energy sources and traditional ones. 4 cents/kWh and onshore wind at 3. “We think that fundamentally this energy. This paper presents average values of levelized costs for new generation resources as represented in the National Energy Modeling System (NEMS) for our Annual Energy Outlook 2025 (AEO2025) Reference case.

Solar power generation is not expensive

Solar and Wind's Hidden Price Tag: Why Cost Isn't the Whole Story

Solar and wind power have become increasingly cost-competitive over the past decade, prompting claims that they are now the cheapest sources of new electricity. Federal and state ...
