

Solar power generation motor self-made

Overview

In this video, I'll show you how to build a DIY Solar Motor Generator using just 5 solar cells, two DC motors, and a simple gear system. Last Updated on Octoby Swagatam 65 Comments A self-powered generator is a perpetual electrical device designed to infinitely run and produce a continuous electrical output which is usually larger in magnitude than the input supply through which it's running. Having a portable power. Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. Do you have what it takes to make one yourself?

My family owns a cozy off-grid cabin in the hills, but since there's no electricity, I'd only stay there. Imagine having your very own DIY generator that you've crafted from scratch, practically for free. Drawing energy from the sun or wind to fuel your electronics, no matter where you find yourself, is within reach, even if you're not an expert. You don't need to be an expert to build one.
