

Solar power generation plus geothermal source

Overview

Geothermal co-production with solar PV is a natural pairing and several geothermal operators have switched over to this model. Examples include Cyrg Energy's Patua project, Ormat's Tungsten Mountain project, and ENEL's Stillwater project. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. Guangdong Zhu, Craig Turchi, Greg Mungas, Nick Kramer, John King, and Jose Castro.

How Geothermal and Solar Energy Work Together

Geothermal energy comes from the heat stored beneath the Earth's surface. Imagine tapping into a natural underground furnace to generate electricity or heat your home. Cool, right? ...

Upgrading Both Geothermal and Solar Energy

It is concluded that the integration of geothermal and solar systems could upgrade the quality of both geothermal and solar energies in terms of either efficiency or power generation cost in many cases.
