

Solar power market competitiveness

Overview

This solar market report delivers an in-depth analysis of the market's key characteristics, including size, growth potential, and segmentation. 69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.30 billion by 2034, registering a CAGR of 9.3%. This substantial revenue growth is driven by factors such as declining photovoltaic module costs, supportive government policies worldwide, and increasing. The size of the U.S. solar power market is projected to reach USD 273.4 billion by 2034, registering a CAGR of 9.3%.

Solar power market competitiveness

Application scenarios of energy storage battery products

Global Market Outlook for Solar Power 2025-2029

In our most realistic scenario, we anticipate a 10% increase in installations to 655 GW in 2025, with annual growth rates remaining in the low double digits between 2027-2029, reaching 930 ...
