

Solar powered house generator in Uzbekistan

Overview

Looking at small-scale projects, in order to increase solar PV generation while promoting self-consumption by individuals and businesses, the government approved a targeted programme for the installation of 150 000 rooftop solar PV with a capacity of 2-3 kW and the. Looking at small-scale projects, in order to increase solar PV generation while promoting self-consumption by individuals and businesses, the government approved a targeted programme for the installation of 150 000 rooftop solar PV with a capacity of 2-3 kW and the. More than 35,000 households in Uzbekistan received state subsidies for exporting surplus electricity from rooftop solar systems between January and September, says the State Tax Committee, as participation in the Solar Home program accelerates nationwide. Image: Daniele La Rosa Messina/Unsplash. Households in Uzbekistan earned more than \$17 million from selling solar-generated electricity to the national grid in 2025, as participation in the state-backed “Solar home” program expanded sharply. According to the State Tax Committee, 45,381 individuals received budget subsidies for electricity. Uzbekistan paid out UZS 209. The program launched in April 2023 and provides a subsidy of 1,000 soums (about \$0. 08) for every 1 kWh of electricity.
