

# Solar support design engineering

## Overview

---

At its core, solar design engineering is the science and strategy behind developing solar PV systems that are safe, efficient, code-compliant, and economically viable. KMB Design Group is at the forefront of the escalating solar industry, and is considered a leading consulting firm in the renewable energy field providing photovoltaic design and engineering services. Licensed in 50 states, we have the ability to work nationally without limitations. Our team delivers data-driven, constructible designs that maximize energy performance, simplify interconnections, and meet every regulatory and utility requirement — from. In the world of solar installation, success is built on more than just mounting panels on a roof. Provide full. From simple roof layouts to pre-construction development sets and complex Electrical 3 3-line diagrams, S&R Solar Design is your one-stop shop. We can design flat or pitched roof solar PV as well as low and high canopies to maximize the design. Our expert team of solar engineers and designers combines advanced software.
