

Solomon Islands New Energy Battery Site Energy

Overview

HONIARA, SOLOMON ISLANDS (12 September 2024)- The Asian Development Bank (ADB) and the Government of Solomon Islands are joining other partners to help Solomon Islands transition to renewable energy with a transformational project that will accelerate renewable energy. HONIARA, SOLOMON ISLANDS (12 September 2024)- The Asian Development Bank (ADB) and the Government of Solomon Islands are joining other partners to help Solomon Islands transition to renewable energy with a transformational project that will accelerate renewable energy. HONIARA, SOLOMON ISLANDS (12 September 2024)- The Asian Development Bank (ADB) and the Government of Solomon Islands are joining other partners to help Solomon Islands transition to renewable energy with a transformational project that will accelerate renewable energy generation and battery storage. With a capital expansion programme of over SBD1 billion, Solomon Power strives to develop and implement its planned capital and infrastructure projects over the next five years that will support its mission to provide a safe, reliable and affordable supply of electricity to the Solomon Islands. The Solomon Islands is taking a significant step towards a sustainable energy future by enhancing its solar power capacity. This ambitious initiative, backed by crucial support from the Asian Development Bank (ADB) and the Saudi Fund for Development, is set to reduce the nation's reliance on small-scale battery storage systems. EIA defines large-scale (or utility-scale) systems as being connected directly to the electricity grid and having a nameplate power capacity (the maximum rated output of a generator, usually indicated annual capacity additions in 2024.
