

# Somaliland electricity installation solar power generation home

## Overview

---

Abu Dhabi Fund for Development (ADFD) funded solar energy project at Berbera City in Somaliland has been connected to the local electricity grid. It will meet the increasing demand of the entire city of approximately 50,000 people. Somalia's abundant sunlight makes it ideal for solar energy. Why should I. Solar photovoltaic (PV) systems are well-suited to both urban centers and remote rural areas. Wind Energy: Wind speeds in parts of Somaliland, especially in coastal and elevated areas, are favorable for wind turbines, with potential generation capacity exceeding 400 MW in targeted regions. Harnessing abundant solar and wind resources to transition from high-cost diesel to sustainable, affordable energy for all.
