

Special field crane for photovoltaic panels

Overview

Rubber-tired gantry cranes comprehensively address all lifting requirements in photovoltaic projects. They reliably handle everything from large photovoltaic racks and load-bearing steel beams to precast concrete foundation blocks and grouped solar panel assemblies. Powered by diesel engines, electric motors, or hybrid systems, it can move freely without fixed rails. Compared to traditional rail-mounted gantry cranes, it offers broader applicability, unrestricted by track laying. Our high-tonnage truck crane emerges as an indispensable partner, offering an unmatched combination of versatility, maneuverability, and reach to overcome even the most challenging projects. Their design prioritizes efficiency and precision. The distinct challenges that renewable energy projects involve—remote sites. With our in-house fabrication team, certified welders, and technical design, we can create and build the power skid you need.
