

Specialized container for power generation

Overview

Generator Container is a specialized mobile power unit that integrates a power generator, fuel storage, and control systems within a modified shipping container, designed to deliver on-demand electricity across various off-grid or temporary scenarios. Interport's shipping containers can be fully customized with a wide variety of modification options, depending on your power. Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for. At MODS, we design and fabricate high-performance generator and power units built from shipping containers. Our solutions provide reliable energy generation and storage for industries, construction sites, events, and remote operations. These solar containers are designed to.

Specialized container for power generation

Stationary and mobile container solutions for energy systems

Zeppelin Power Systems offers flexible mobile and stationary container solutions for reliable power and heat supply across various industries. Whether at airports, data centers, utilities, energy producers, ...
