

Steel columns for flexible photovoltaic support in sewage treatment plants

Overview

Our newly released video provides an in-depth look at the complete installation process of an innovative flexible support system. This solution is engineered for irregular terrains such as mountains, hills, deserts, and ponds, making it suitable for diverse applications including. te for photovoltaic module installation and utilization. The new system uses suspension cables. The invention discloses a convenient-to-detach photovoltaic steel structure bracket of a sewage treatment plant, which comprises a photovoltaic bracket, wherein the photovoltaic bracket comprises a mounting foundation, a reinforcing vertical rod and a plurality of mounting vertical rods are mounted. The flexible photovoltaic support originates from the roof of suspension structure and glass curtain wall. It is a photovoltaic support system supported by suspension structure. The suspension structure consists of a series of tensioned cables as the main load-bearing components. It has the advantages of large span, fast construction speed, and can adapt to complex environments.

Steel columns for flexible photovoltaic support in sewage treatment

CN117895877A

The invention relates to the field of photovoltaic brackets, and more particularly to a photovoltaic steel structure bracket for a sewage treatment plant which is easy to disassemble.
