

Survey of wind and solar complementary power for solar-powered communication cabinets

Overview

This paper studies structure design and control system of 3 KW wind and solar hybrid power systems for 3G base station. The environment resources of communication stations in a remote mountain area are analyzed and a reliable and practical design scheme of wind-solar hybrid power. A study 12 designed and implemented a solar hybrid power solution for off-grid telecommunication sites; a diesel generator was used to support the site whenever there was insufficient energy. Communication base station stand-by power supply system.

Survey of wind and solar complementary power for solar-powered c

Communication base station wind and solar complementary battery

The invention relates to a communication base station stand-by power supply system based on an activation-type cell and a wind-solar complementary power supply system.
