

Tajikistan s power grid generation-side energy storage subsidies

Overview

All infrastructure components are financed through grants from the European Union and German Federal Foreign Ministry via KfW and the PATRIP Foundation, channelled via the Aga Khan Foundation (UK), and implemented by Pamir Energy Company. Tajikistan's electricity sector is almost solely based on hydropower and is characterised by seasonal surpluses and shortages, and a state-owned electric utility with financial viability issues. The power sector is undergoing several institutional reforms to alleviate these challenges including. Hydropower remains the dominant source of electricity generation, accounting for nearly 98 percent of the country's power mix, with the remainder derived from hydrocarbons and minor sources. From 2009-2016, approximately 70 percent of the Tajik population suffered from extensive electricity shortages during winter. The lower water flows in the winter season prevented full. " takes the first place - 48-50%. Energy intensity of industry in Tajikistan,i.,the amount of energy consumed on average per unit of product,is approximately 10 times high at such energy resources as oil and gas. Russia and Kazakhstan are responsible for the major part of these resources.
