

The largest wind power station

Overview

The Inner Mongolia Hinggan League wind power base (phase 2) in China is the largest wind farm in the world. Some wind farms now span hundreds of square miles and power millions of homes. The biggest wind farm in the world is part of a larger 70 GW green energy initiative called “Western Green Energy Hub (WGEH)” located in Australia. 4 gigawatts of capacity, Hornsea 2 was the largest offshore. The largest renewable investment, by far, is the Forsen Vind wind farm, an onshore installation, located in central Norway. Since Forsen Vind began operation, it has more than doubled.

The largest wind power station

The 7 largest wind farms in the world

We've looked into the largest of these wind farms, including the recently-announced offshore wind farm that will be built off the coast of Scotland. In this guide, we'll cover how many ...
