

# The price of distributed photovoltaic panels

## Overview

---

The average price of solar panels used in distributed generation projects in the US increased from US\$0.25/W at the start of the year to a high of US\$0.30/W. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. NLR's Distribution Grid Integration Unit Cost Database contains unit cost information for different components that may be used to integrate distributed solar photovoltaics (PV) onto distribution systems. 3%, said a Q4 report from procurement platform provider Anza Renewables.

## Updated Report & Data Illustrate Distributed Solar Pricing & Design

PV system prices fell year-over-year for residential systems, but rose for non-residential systems. From 2022 to 2023, median installed prices for residential systems fell by roughly \$0.1/W
