

The solar inverter cannot connect to the network

Overview

Check signal & power-cycle: Make sure your home Wi-Fi is detectable at the inverter location, then power-cycle the inverter (off → on) to attempt an automatic reconnect. Open mySolarEdge → Menu (≡) → Inverter Communication → scan the inverter QR code. You can reconnect an inverter to a local Wi-Fi network with the mySolarEdge application. If the inverter is not responsive, contact your SolarEdge. If you aren't seeing data on your mySolarEdge monitoring app, chances are your inverter has lost connection to your WiFi network. Joe Springer, Springers Solar's Director, walks you th. status appears but the Device Setup interface never launches.

The solar inverter cannot connect to the network

Troubleshooting SolarEdge Inverter Connection Issues After Changing

When you change your internet provider or get a new router, your SolarEdge app will stop working. This is because your inverter is no longer connected to the internet.
