

The solar panel of the lamp does not store electricity anymore

Overview

Low Battery Capacity: Older batteries may not store enough energy. Dusty Solar Panel: Dirt buildup reduces sunlight absorption. To start, if your new solar light isn't working, check and remove the pull tab on the battery, which prevents discharge during shipping. But that doesn't mean their functionality is entirely dead. Here we've identified some of the major reasons your solar lights suddenly stopped working. To restore solar lights that have stopped working, you must first identify the source of the problem. Identify the issue with the solar panel, 2. Dirty Panels Can't Charge It only takes a thin layer of pollen, dirt, or bird.
