

# Tokyo california solar energy

## Overview

---

Starting in April 2025, Tokyo will require installing solar panels on all new residential buildings. This initiative is part of the “Carbon Half” goal, aiming to reduce greenhouse gas emissions in Tokyo by 50% by 2030 through the expansion of renewable energy usage. The new regulation will require large house builders—those undertaking projects. Although solar power provides clean, carbon-free energy, Tokyo has few open spaces large enough to build a major solar power plant. For more information on the mandatory solar power generation installation measure, please view the Ordinance Revision to Halve Carbon Emissions (Carbon. From Ap, all new homes built by major developers in Tokyo will be required to include rooftop solar panels.
