

# Tschinwali Off-Grid Solar Outdoor Cabinet Corrosion- Resistant Type

## HEAT DISSIPATION

Cold aisle containment,  
making optimal refrigeration effect;

## Overview

---

With IP54/IP55 protection, anti-corrosion design, and intelligent temperature control, they are ideal for telecom base stations, remote power supply, and containerized microgrids. Our outdoor cabinets are pre-assembled for quick deployment and can operate reliably under wide. SWA ENERGY outdoor cabinets are engineered for harsh environments and long-term outdoor operation. Our outdoor cabinets. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is. Maximum solar array current: 20 amps Maximum recommended PV input power: 260W (12V), 520W (24V) Rated load current: 20A Operating temperature: -31°F to 113°F (-35°C to 45°C) Dimensions This solar charging system helps get you off the grid with a 200-watt solar panel that provides DC power to charge. The Outdoor Cabinet Energy Storage System is a fully integrated solution that combines safe battery storage, intelligent power management, and weatherproof protection for solar and telecom applications. It is built specifically for outdoor installation and integrates advanced LiFePO<sub>4</sub> battery.

## Tschinwali Off-Grid Solar Outdoor Cabinet Corrosion-Resistant Type

---

### Outdoor Electrical Enclosure for Harsh Environments

Featuring an IP55/IP65-rated enclosure, it offers excellent resistance to water, dust, and corrosion, making it ideal for solar energy, wind-solar hybrid, off-grid, and industrial backup power systems.
