

Types of car charging stations

Overview

There are primarily three types of EV charging stations: Level 1, Level 2, and DC Fast Chargers. Level 1 chargers utilize a standard household outlet and are typically the slowest, making them suitable primarily for home use. We will address not only the technology but also the larger puzzles - what will be the transport economics of Fleet Electrification?

What are the changes in dynamics of. Do all electric cars use the same type of charger?

That depends on your own definition of a charger.
