

# U S stacked energy storage battery imports

## Overview

---

Tariff chaos reigns supreme in the development of the US stationary battery energy storage industry. When these stockpiles are exhausted the outlook. Proposed tariff increases on Chinese lithium-iron-phosphate (LFP) battery imports threaten to disrupt the United States' deployment of battery energy storage systems (BESS), a critical enabler of grid stability and the renewable energy transition. While the Inflation Reduction Act (IRA) has. New analysis from Clean Energy Associates (CEA) and Wood Mackenzie highlights the challenges facing the US battery storage market due to trade tariffs. According to research firm Wood Mackenzie's new report, 'All aboard the tariff coaster: implications for the US power industry,' tariffs on imports. It's complicated, experts say Battery system costs have already soared past 2023 levels, one analyst says, but insiders are cautiously optimistic for a more resilient supply chain in the longer run. Add us as a Google Preferred Source to see more of our articles in your search results. Imports of lithium-ion batteries totaled 74,462t in May, up 12pc from a year earlier but down 27pc from April, according to customs data. Following the Geneva agreement in May.
