

UK Mobile Energy Storage Containers for Long-Term Use in Environmental Protection Projects

Overview

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. AG's Energy team looks at the detail. Introduction: The UK has a legally binding target to bring greenhouse gas (GHG) emissions to net zero by 2050 (DESNZ, 2022). As evidenced by HM Government's (2020) Ten Point Plan for a Green Industrial Revolution, the generation of electricity from renewables will be key part of achieving net zero. In March 2024, the House of Lords Science and Technology Committee said increasing the UK's long-duration energy storage capacity would support the UK's net zero plans and energy security. LDES solutions could reduce energy waste, lower consumer costs and provides the grid flexibility needed to replace fossil fuels.

UK Mobile Energy Storage Containers for Long-Term Use in Environment

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55

UK Energy Storage: The Systems Powering Britain's Green Future

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.
