

# Understanding Photovoltaic Panel Labels

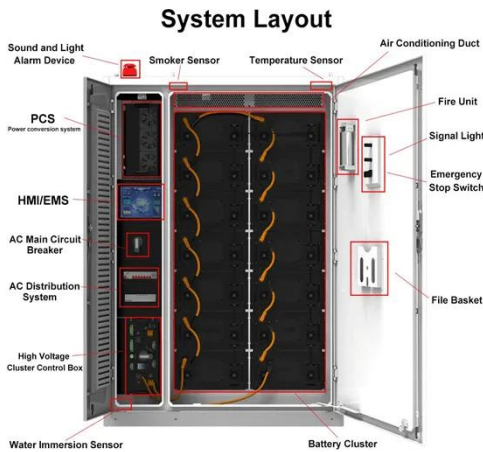

## Overview

---

The National Electrical Code (NEC) Section 690 outlines specific labeling requirements for photovoltaic (PV) systems to ensure safety and compliance. For a master or journeyman electrician, correctly applying these labels is crucial for passing inspection and ensuring the long-term safety of first responders and maintenance personnel. This article consists of eight Parts, with the general requirements (Part 1) or stand-alone with or without energy storage (Parts 2-8). All conductors must be identified. Scope of This Guide — This article summarizes some of the current and new requirements regarding proper labeling for standard solar and wind installations. The NEC 2023 code revision was published in October of 2022. Solar power system labels are a mystery to many.

## Understanding Photovoltaic Panel Labels

### How to Properly Label a PV System per NEC 690 Part VI

A visual guide to the specific labels and plaques required for solar PV systems by NEC Article 690, including placement and wording for all required warnings.
