

# Uninterrupted power supply cost

## Overview

---

An uninterruptible power supply (UPS) typically costs between \$50 and \$10,000+, depending on capacity, type (standby, line-interactive, or online), and features. Entry-level models for home use start at \$50-\$200, while enterprise-grade systems with high wattage and. Amazon. : Electronics New customer?

Start here. Check each product page for other buying options. This article outlines the cost drivers, pricing ranges, and practical. An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Safeguard your costly computer equipment from potential damage that can be caused by power spikes and surges.
