

# Use aluminum square tube to make solar bracket

## Overview

---

In this video I build a rack to hold a 275 watt solar panel out of 1" square tubing. I have access to a lot of 1.5" x 1/8" thick aluminum square tubing. Has anyone ever used this for racking, if so, how did it turn out?

Most folks use unistrut because its. How to install a solar panel rack?

The first step is to measure your solar panels. All of the pieces, parts and hardware for this ground mount can be purchased from your local big box store. Use the. To save weight, I bought some 2" 1/8 wall square tubing for a solar rack I was trying to build for a stepvan to mount 4 large (75 lbs each) solar panels over the fiberglass roof of the stepvan. I got aluminum to keep the weight down, but now I'm struggling to find a way to connect the tubes. Have you tried out dark mode?

! Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! I have access to a lot of 1. Why Choose EZTube for Your Solar Panel Frames?

1. No drilling is required for the HQST.
