

Wellington small base station energy storage lithium battery installation

Overview

Project Summary The Wellington Battery Energy Storage System project consists of a grid-scale BESS with a total anticipated discharge capacity of 500MW and a storage capacity of 1,000MW hours. The project will have 6,200 battery enclosures with lithium-ion batteries. An on-site BESS substation will be built with two 330kV. The project is in the Central West Orana Renewable Energy Zone three kilometres north-east of Wellington. Construction of Stage 1 (300MW / 2 hours) will start mid-2025, finishing early 2027. 2 km north-east of the township of Wellington in the Dubbo Regional Council local government area (LGA) and.

Wellington small base station energy storage lithium battery install

2025 AMPYR Project Factsheet Wellington

Construction of Stage 1 (300MW / 2 hours) will start mid-2025, finishing early 2027. Plans for construction of Stage 2 are ongoing, but construction is likely to follow 12 to 18 months behind Stage 1. The existing ...
