

# What is the easy-to-clean coating for photovoltaic panels

## Overview

---

Diamon-Fusion® is the leading ceramic coating for solar panels. The easy-to-clean coating is used by solar panel cleaning businesses and manufacturers around the world to help prevent stains and corrosion. Organic contaminants like dust, bird droppings, pollen, carbon deposits, and. These ultra-thin protective layers represent a quantum leap in photovoltaic efficiency, combining anti-reflective properties with self-cleaning capabilities that significantly extend panel lifespan and performance. European solar installations equipped with the latest hydrophobic and oleophobic. Centre for Solar Energy Materials International Advanced Research Centre for Powder Metallurgy and New Materials Balapur PO, Hyderabad-500 005, India. Self clean (easy to clean) technology is generally related to protect the PV panels from dust/dirt, corrosion and all sorts of weather conditions. It is an ideal solution for enhancing photovoltaic performance and increasing energy output on solar panels by allowing more sunlight to pass through the. Recently, Hong Kong startup SAMBO introduced a hydrophilic self-cleaning nano coating designed to mitigate potential material degradation and reduce cleaning costs for photovoltaic stations in both dry and humid environments.
