

# What is the energy storage battery plant in Spain

## Overview

---

Stellantis and CATL have announced they have reached an agreement to invest up to €4.1 billion to form a joint venture that will build a large-scale European lithium iron phosphate (LFP) battery plant in Zaragoza, Spain. Spain had 88MW of capacity in 2022 and this is expected to rise to 2,500MW by 2030. Designed to be completely carbon neutral, the battery plant will be. In a significant move that underscores the growing momentum in the electric vehicle (EV) sector, Stellantis, the automotive giant behind brands like Chrysler, Dodge, Jeep, and Citroen, has teamed up with China's CATL, a leading energy solutions company, to establish a joint venture focused on. A significant development in the electric vehicle industry has been announced as CATL, a leading Chinese battery manufacturer, and Stellantis, a major global automaker, join forces to build a \$4. The planned facility is set to become one of the. Spain's €700 million program aims to boost battery storage capacity by adding 2. The initiative supports over 100 projects, promoting economic growth and community benefits while reducing reliance on fossil fuels. Electricity is a resource easy to generate, transport and transform, but its storage is a constant challenge in today's energy landscape.

## What is the energy storage battery plant in Spain

### Top five energy storage projects in Spain

The Casablanca Solar Power Plant - Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project located in Talarrubias, Badajoz, Spain.
