

# What should I do if the photovoltaic panel components are not flat

## Overview

---

Yes, you can install solar panels flat, but they will experience a degree of energy loss without the slightest inclination toward the sunlight. Although it certainly is advantageous to have a roof that is inclined in the sun's direction, a flat surface will also do. Meta Description: Discover why uneven photovoltaic panels occur and how to fix them. Understanding the extent of the damage is crucial for determining the right course of action. Following this evaluation, collect. Solar panels are a great investment for most homes and businesses, but a surprising number of owners do not know if their solar panels are working correctly or if the system is performing as expected. That said, it's important to know when to fix solar. If you're having issues with your solar system and suspect that the inverter is to blame, you should first check for any error codes or messages that might be displayed on the inverter itself.
