

# What signal batteries are there in the battery cabinet

## Overview

---

Within the industry, backup batteries for traffic signal boxes are commonly referred to as deep cycle batteries. In actuality, the best replacement option for these applications are high-rate AGM batteries. Our organization can help with installation, external cabinet, operation, programming, and temperature compensation. A 12-V battery can be used to raise the utility line voltage when it drops below a preset limit. The limit may be user-defined or use manufacturer default.
