

Which is better for bidirectional charging of energy storage cabinet

18650 3.7V
Li-ion
RECHARGEABLE BATTERY

2000mAh

Overview

In summary, integrating advanced bidirectional power supplies like the BIC-2200 into home energy storage systems significantly enhances their efficiency and reliability. Meanwhile, lower-cost alternatives to lithium, such as sodium-sulphur, are also being developed. For example, when solar panels generate excess power that is not immediately consumed by home appliances, the control system can direct the power to the bidirectional power supply and convert. Reverse charging, when applied to electric vehicles and homes, allows the vehicle's battery to serve as a power source for residential use. Your home runs on AC power.
