

Wind Jun 5 generator plug wiring position

Overview

This diagram shows the correct way to wire a generator with a 120/240V output to a power inlet box or transfer switch. These diagrams also show the flow of electricity from one. The above diagram gives you a general layout of how the system is wired. You will mount a box on the back of the stator plate to house the wires from the stator and the wire that will dangle down the center of the pole. Work in a dry, well-lit area to.

Wind Jun 5 generator plug wiring position
