

Wires coming out of photovoltaic panels

Overview

A solar panel has two wires coming out from it, a + and -. The + and - refer to each wire's "polarity" To be used, a solar panel must get hooked up to a charge controller. If you just use a single panel, there. Solar panel connectors are one of the most underestimated components in photovoltaic (PV) installations, but they are one of the most essential. if you're unfamiliar with the terms, this guide is for you.
