

Xiaoxiang builds solar power plant

Overview

The world's biggest solar plant has come online in China, capable of powering a small country with its annual capacity of more than 6 billion kilowatt hours. The facility in a desert region of the north-west province of Xinjiang covers 200,000 acres - roughly the same area as New York City. The 5GW. The Xinjiang region already has a few huge solar farms, like this one, thanks to its low population and desert climate. Covering 13,333 hectares (32,947 acres) in the desert of northwest Xinjiang and capable of powering a. XINING, June 9 -- Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, simultaneously generating electricity while making exemplary contributions to poverty alleviation and ecological. The world's largest solar farm, in the desert in northwestern Xinjiang, is now connected to China's grid. 5-gigawatt (GW), 33,000-acre solar farm is outside Urumqi, Xinjiang's capital.
